

Reduce your parking lot lighting cost by up to 70%

Your local utility may pay up to 70% of the project cost to replace your old inefficient lighting system.

Pacific Energy Solutions LLC is a NW based company and one of North Americas leading suppliers of Industrial and Commercial lighting solutions. Pacific Energy Solutions delivers innovative, cost effective lighting and design solutions. If you are seriously considering a lighting upgrade for your facility, we urge you to explore our lighting solutions and discover why Pacific Energy Solutions should be your 1st choice for an Energy Efficient lighting system...

Pacific Energy Solutions is the knowledgeable partner you've been looking for to design an intelligent lighting solution to reduce the high cost of electricity, maintenance and operations.

Every penny you eliminate from your operating costs is extra profit dropping to your bottom line. Pacific Energy Solutions makes that profit possible, and painless.

In today's economy there are increasingly fewer ways for businesses to reduce O&M cost. Often overlooked are relatively easy lighting technology upgrades. You may have made upgrades to your indoor lighting? But there have been few if any viable options to reduce your outdoor energy consumption.

Until now !!!

Pacific Energy Solutions now offers lighting solutions for outdoor applications that will improve your lighting quality while providing substantial energy savings

How much will you save?

The amount of savings will vary from project to project. However if you currently have metal halide or high pressure sodium (HID) outdoor lighting, typical energy savings is 50% plus. With today's rising cost of energy the positive impact to your bottom line could be significant.

Below are some examples of annual energy savings assuming a KW hour cost of \$.08 and an average run time of 12 hours per night.

Examples below are per fixture

Fixture Type	250-watt HID	T5 Fluorescent	Savings
Wattage	290	55	83%
Annual cost	\$101	\$19	\$82

Fixture Type	400-watt HID	T5 Fluorescent	Savings
Wattage	460	110	77%
Annual cost	\$161	\$75	\$106

Fixture Type	1000-watt HID	T5 Fluorescent	Savings
Wattage	1080	351	68%
Annual cost	\$377	\$110	\$267

Actual wattage & lamp quantity used for replacement may vary depending on mounting height

Case Study

Nissan & VW Auto Dealer

This well known NW Nissan and VW dealer was looking for opportunities to reduce their high energy cost. Their goal was to reduce energy consumption, however with sales and service being a top priority superior lighting quality was mandatory. The solution was to replace the outdoor lighting with new T5HO fluorescent pole mounted fixtures on the lots and T5HO highbay fixtures in the shop.

The annual cost to run the existing lights \$18,724

The estimated annual energy cost after is \$6,558

Savings of \$12,166 65%

In addition

Snohomish County PUD (the electric utility)

paid for 60% of the project cost

Do not miss out on local utility funding programs!

Our energy efficient lighting solutions qualify for most electric utility incentive and funding programs. Many electric utilities in North America offer incentive programs that pay up to 70% of the project cost.

Free Lighting Energy Audit

Contact us Today

An energy audit is at no cost to you and will provide you estimates of what your current energy cost is, as well as what energy reduction measures are available along with estimated energy savings. We can also provide you estimates of what your local utility has to offer in terms of incentives.
